phd⁺
PLUS
Electric Automation Solutions

Series EGRR Electric High Capacity Gripper

Built on the field proven Series GRR chassis, the electric version offers many of the same benefits as the pneumatic. Plus, you receive the design flexibility of Your Motor, Your Way features.

EGRR01

**ISO 9001
REGISTERED**
Quality Management
System Certified

Major Benefits

- Servomotor control provides acceleration, velocity, and position feedback.
- Compact design provides high grip force, large moment capacities, long jaw travel, and low overall weight for applications with limited space.
- Rugged construction withstands high impact and shock loads in demanding industrial environments.
- Three large diameter jaw guides spanning the length of the gripper provide stable jaw travel, long allowable tooling length, and high moment capacities.
- Robust rack and pinion jaw drive provides repeatable jaw positioning.
- **Your Motor, Your Way** allows motor and controls flexibility at no additional cost.
- Optional PHD-supplied Kollmorgen® motor matches performance of popular pneumatic Series GRR Guardian® Gripper.

ORDERING DATA: SERIES EGRR ELECTRIC HIGH CAPACITY GRIPPER

Example Ordering Data:

E	G	R	1	2	5	63 x	200	V1-Z1	RW151	Wxxxx	Mxxxx
Electromechanical	Gripper	Regular Duty	Long Travel, High Capacity Parallel Gripper	Synchronized, Standard Grip	Design No. 5 - Metric 1 - Imperial See Note	Size	Jaw Travel mm in 150 5.906 200 7.874 250 9.843 300 11.811 350 13.780 (Home positioning may reduce usable travel)	Options V1 - Fluoroelastomer seals and wipers Z1 - Fully corrosion-resistant coating on jaw guides and drive racks. NOTE: Fasteners are corrosion resistant as standard	15:1 Motor Speed Reducer	Motor Mounting Code W0174 - Direct mounting for Kollmorgen® AKM33H-AND2CA00 Wxxxx - Open architecture part number code (configure code online) W0000 - Blank Motor Mounting	Motor Code (requires RW151-W0174) M1095 - PHD-supplied Kollmorgen® AKM33H-AND2CA00 (performance comparable to PHD Series GRR Gripper) No Code - No Motor

Options must be ordered together

NOTE: Design Number dictates imperial or metric mountings. Dowel pin holes are metric regardless of design number.

MOUNTING OPTIONS & ACCESSORIES

ENGINEERING DATA: SERIES EGRR ELECTRIC HIGH CAPACITY GRIPPER

SPECIFICATIONS		SERIES EGRR
INPUT TORQUE	Without Motor Speed Reducer	2.9 Nm min to 43.2 Nm max [26 in-lb min to 382 in-lb max]
	With RW151 Motor Speed Reducer	0.3 Nm min to 3.8 Nm max [2.3 in-lb min to 34 in-lb max]
INPUT RUNNING SPEED	Without Motor Speed Reducer	400 rpm max
	With RW151 Motor Speed Reducer	6000 rpm max
JAW GRIP SPEED*		50 mm/sec max [2 in/s max]
OPERATING TEMPERATURE		-28° to +82° C [-20° to 180° F]
RATED LIFE		5 million cycles minimum
GRIP REPEATABILITY		Within 0.05 mm [.002 inch] of original centered position
LUBRICATION		Factory lubricated for rated life
MAINTENANCE		Field repairable (except reducer)

* Jaw grip speed is speed which jaws contact gripped workpiece. Jaws may operate at faster speeds, but must decelerate to grip speed prior to grip.

EGRR12-x-63 x 350	15570	3500	990	9000	825	7500	825	7500

F_a: Total for both jaws

M_x: Allowable moment per jaw, measured from jaw mounting surface

M_y: Allowable moment per jaw, measured from geometric center of jaw

M_z: Allowable moment per jaw, measured from jaw mounting surface

When calculating the value for F_a , include weight of tooling, part weight, acceleration, and external forces. When calculating values for M_x , M_y , and M_z , include the grip force per jaw, part weight, external forces, and acceleration as applicable.

! MOMENT VALUES ASSUME THE USE OF ALL THREADED MOUNTING HOLES.

GRIP FORCE

Total gripping force relative to tooling length is shown below at the stated torque applied to the motor speed reducer input shaft. Grip force per jaw equals the total grip force divided by two. The graphs also indicate the maximum tooling length and maximum rated grip force for each gripper size.

TOOLING LENGTH FACTOR

Jaw tooling should be designed so that the grip point is as close to the jaw surface as possible. As the grip point is moved away from the jaw surface, the applied moment causes jaw friction to increase, resulting in reduced effective grip force. The grip force factor (G_f) values given in the table are for zero tooling length (jaw surface).

The maximum load that grippers can handle will vary based on: size of the part being picked up, shape of the part, texture of the part, speed at which the part is transferred, shape of the fingers, etc. PHD recommends that the fingers of jaws be tooled or machined to conform to the shape of the part being gripped.

GRIP FORCE EQUATIONS:

METRIC: TOTAL GRIP FORCE (N) = (Torque [Nm] x G_F) x Tooling Length Factor

IMPERIAL: TOTAL GRIP FORCE (lb) = (Torque [in-lb] x G_F) x Tooling Length Factor

GRIP FORCE CALCULATION EXAMPLE:

Gripper: Series EGRR Size 63 x 200

Common Parameters:

Input Torque = 3.4 Nm [30 in-lb]

Tooling Length = 254 mm [10 in]

- Determine Grip Force Factor G_F** = 937 [23.8] (from table on page 4)
- Determine Tooling Length Factor** = 0.84 [0.84] (from Tooling Length Factor graph on page 5)
- Total Grip Force Calculations:**
 - For Standard Unit:** EGRR12-5-63 x 200 [EGRR12-1-63 x 200]
 - Total Grip Force** = 3.4 Nm x 937 x 0.84 = 2676 N [30 in-lb x 23.8 x 0.84 = 600 lb]

FULL TRAVERSE TIME

Full traverse time is the shortest time possible for the jaws to completely traverse the total travel of the gripper. Use PHD Sizing Software to calculate the motion time for your specific motion profile. Full traverse time assumes that the jaws are accelerated at 1 G (0.5 G per jaw) up to the motor running speed, then travel at the motor running speed until decelerated at 1 G (0.5 G per jaw) to rest.

FULL TRAVERSE TIME EQUATION:

TIME (sec) = $[C_F1 \div \text{Running Speed (rpm)}] + [\text{Running Speed (rpm)} \div 69120]$

FULL TRAVERSE TIME CALCULATION EXAMPLE:

Gripper: Series EGRR Size 63 x 200

Common Parameters:

Motor Running Speed = 5500 rpm

- Determine Time Factors:**
 - C_F = 1410 (from table on page 4)
- Release Time Calculations:**
 - For Standard Unit:** EGRR12-5-63 x 200 [EGRR12-1-63 x 200]
 - Open or Close Time** = $[1410 \div 5500 \text{ rpm}] + [5500 \text{ rpm} \div 69120] = 0.336 \text{ sec}$

JAW TRAVEL EQUATIONS:

The jaw travel equation relates the rotation of the gripper or motor speed reducer input shaft to the linear travel of the jaws.

METRIC: TOTAL JAW TRAVEL (mm) = Input Shaft Rotation (rev) x J_T

IMPERIAL: TOTAL JAW TRAVEL (in) = Input Shaft Rotation (rev) x J_T

JAW TRAVEL CALCULATION EXAMPLE:

Gripper: Series EGRR Size 63 x 200 -RW151 -W0000

Common Parameters:

Motor Rotation = 2 rev

- Determine Jaw Travel Factor J_T** = 8.512 [0.335] (from table on page 4)
- Jaw Travel Calculations:**
 - For Standard Unit:** EGRR12-5-63 x 200 -RW151 -W0000 [EGRR12-1-63 x 200 -RW151 -W0000]
 - Total Jaw Travel** = 2 rev x 8.512 = 17.024 mm [2 rev x 0.335 = 0.670 in]

OPTIONS: SERIES EGRR ELECTRIC HIGH CAPACITY GRIPPER

Z1 CORROSION-RESISTANT

Corrosion-resistant coating on jaw guides and drive racks provides enhanced environmental protection.

V1 FLUORO-ELASTOMER SEALS

Fluoro-elastomer shock pads, seals, and wipers are available to achieve material compatibility with certain fluids. Material compatibility should be checked with the fluid manufacturer for proper application. This option includes Series GRR -V9 fluoro-elastomer seals and jaw guide wipers option.

RW151 MOTOR SPEED REDUCER

A 15:1 drive ratio motor speed reducer is installed onto the gripper. The reducer is factory lubricated for the rated life of the gripper. The motor speed reducer provides a convenient means of matching the output torque and shaft speed of many motors to the input requirements of the gripper.

The reducer must be ordered with a motor mounting code. See page 9 for details.

Motor mounting fasteners and motor coupling are supplied unassembled along with assembly instructions.

Use **-W0174** motor mount code to provide the proper interface for use with a PHD-supplied Kollmorgen® motor when option **-M1095** is specified.

Use **-W0000** motor mount code to order a motor mount intended for customer modification. See page 3.

The reducer can be easily removed from the gripper for ease of motor installation and field rotated into one of four positions.

Wxxxx MOTOR MOUNT CODE

phdplus.phdinc.com

Your Motor, Your Way customizable motor mounting is generated by PHD's extensive motor database at www.config.phdinc.com. Users may select their compatible motor of choice from the pre-populated motor database. In the event the chosen motor is not in the database, they may enter necessary motor features to generate the PHD motor mount code.

The tailored motor mounting components are included with the gripper and shipped in kit form. See page 8 for -Wxxxx options and dimensions.

Step 1 - Online Actuator Sizing size.phdinc.com

- Input your application data.
- The sizing software will tell you which gripper and motor performance parameters are needed for your application.

Step 2 - Motor Selection

- Based on the performance requirements determined by online sizing, select an appropriate motor from your preferred motor manufacturer.
- Return to the online sizing software with identified motor parameters to verify motor to application compatibility.

Step 3 - Your Motor, Your Way Configurator config.phdinc.com

- Select your motor from the drop down menus or enter the necessary motor geometry.
- The generated motor mount code for the compatible motor will complete the ordering data necessary to order the gripper tailored to your specific application.
- 3D CAD models are also available.
- If a blank motor mount is desired for special motor requirements, use -W0000 to order a motor mount intended for customer modification.

M1095 KOLLMORGEN® MOTOR

Factory-installed Kollmorgen® AKM33H-AND2CA00 motor used with a suitable Kollmorgen® motor controller and RW151 motor speed reducer provides grip forces and jaw speeds comparable to PHD's pneumatic Series GRR Guardian® gripper. This option requires options **-RW151** **-W0174**.

The motor may be field rotated to index location of motor connector.

ACCESSORIES:

DRIVE LINK

A single drive link couples the output of the motor speed reducer to the input socket of the gripper. The link is intended to mechanically fail reducing catastrophic damage to the gripper and motor speed reducer if maximum torque is exceeded.

DRIVE LINK KIT

PART NUMBER	DESCRIPTION
88157-0000	Used with Standard Motor Mounting Flange
88157-0018	Used with Oversize Motor Mounting Flange

Kit includes one drive link and installation instructions

ACCESSORIES: SERIES EGRR ELECTRIC HIGH CAPACITY GRIPPER

PROXIMITY SWITCHES - EXTERNAL

This accessory provides for the external mounting of 8 or 12 mm threaded round metal sensing inductive proximity switches. Multiple switches may be mounted using multiple brackets. Proximity switches, targets, and mounting brackets are ordered separately. See the Switches and Sensors section of the main catalog for complete switch specifications.

NOTE: Target and bracket kits do not interchange with Series GRR Grippers Design 1 [5].

8 mm THREADED INDUCTIVE PROXIMITY SWITCHES

PART NUMBER	DESCRIPTION
51422-005-02	NPN (Sink), 2 meter cable
51422-006-02	PNP (Source), 2 meter cable

8 mm & 12 mm THREADED INDUCTIVE PROXIMITY SWITCH TARGET KIT CORROSION-RESISTANT

74994-33

Kit includes 1 proximity switch target and 2 target mounting screws

THREADED INDUCTIVE PROXIMITY SWITCH MOUNTING BRACKET KITS

CORROSION-RESISTANT FOR 8 mm SWITCH	CORROSION-RESISTANT FOR 12 mm SWITCH
74992-33	74993-33

Kit includes 1 proximity switch mounting bracket, 1 mounting nut, and 1 mounting screw
